

Electric Service

CITY OF DOVER

If a Field Service Representative observes a potential **Unsafe Condition** at your location: **loose, rusted, or worn meter socket, or worn entrance cable** that is in need of replacement or repair. This is an unsafe condition for you as a homeowner as well as the public. In addition, **Meter Clearance from bushes, vines, fences, or storage items** must be rectified before service is energized.

- Customers should contact a **STATE LICENSED ELECTRICIAN OR APPROVED INSPECTION AGENCY** immediately upon notification of a potential unsafe condition. [*City Ordinance sec., 1-*

Electric Service Guidelines

A handy guide to Independent inspection companies licensed in Delaware that provide electrical inspections for safeguarding of lives and property.

The customer shall be responsible for all wire ways, weather heads, disconnects, entrance cable, conductors, meter sockets enclosures, connectors,

conduits, and all associated equipment.

The customer must allow access to any City property at any and all times.

In no case, will a locking device be installed by the customer to prevent access to meter sockets or City-owned equipment.

The use of jumpers is forbidden.

A minimum horizontal clearance of three feet must be provided in front of the meter socket/enclosure.

Tampering Prohibited

It is unlawful for any person, except a duly authorized representative of the City, to make any temporary or permanent connection or disconnection between the electric service load of the customer and electric service wire of the City.

This creates an unsafe condition for the homeowner, public, and City employee.

In the event that the City's meter or other property are tampered or interfered with, the customer being supplied through that equipment will be subject to tampering charges, fines, and/or arrest.

CITY OF DOVER ORDINANCE

City Ordinance [sec., 1-501]

All services that have been de-energized for more than **SIX** months shall be re-inspected prior to re-energizing.
