

Please be advised that only those sites meeting the requirements of the installation detail, including finished grade, will be approved by the Department of Water & Wastewater. Meters will not be unlocked, for any purpose, and a Certificate of Occupancy will not be issued until the installation is inspected and approved.

In addition, it should be noted that the turning on and off of water is to be performed by authorized City of Dover personnel only. Under no circumstances should a plumber or other contractor be allowed to do so on their own. Contractors are also not permitted to perform any valve operations on the water system or connect to hydrants for any reason.

After the meter is received the customer shall contact the Department of Water & Wastewater within forty-eight (48) hours to have your meter inspection scheduled.
