PO Box 475  
Phone: 302-736-7025

Dover, DE 19903  
Fax: 302-736-4217

### RENOVATION CHECKLIST FOR PLUMBING AND BUILDING PERMIT APPLICATION

The City of Dover's Water / Wastewater Handbook defines a renovation project as any project which proposes to change the character of the water and/or wastewater service at a subject location. Examples of such changes include, but are not limited to, changes in plumbing fixture quantity, changes to the size of the water line serving the location, changes to the size of the sanitary sewer line serving the location, and/or relocation of the water meter, water line and/or sewer line serving the location. All renovation projects are required to bring the component of the water and/or wastewater service to be changed up to current standards and specifications as part of the proposed project.

In order to determine if your project requiring a Plumbing or Building Permit is applicable please complete the following checklist. If you answer "Yes" to any of the questions below your project may be subject to the renovation project requirements of the Department of Public Works.

In addition to the water / wastewater concerns, the Department of Water & Wastewater is requiring further questions related to the multiple divisions within this Department. These divisions include sanitation, grounds, streets and storm sewer. Each division could be impacted by a plumbing or building permit application. The purpose for the questions related to the aforementioned divisions is to assure the City of Dover as well as the property owner, that all services to the property can be maintained according to the current code.

If there is a recorded easement on your property, such as, but not limited to, utility, cross access, drainage, then building a structure, including a fence, within the easement is prohibited. The purpose of an easement is to allow the proper authorities access to their infrastructure. This cannot be accomplished with a structure built above a piece of infrastructure.

This form will be forwarded to the Department of Water & Wastewater and you will be contacted directly by a representative of the Department, within five (5) business days, regarding specific requirements and additional information that may be required. All requirements will be provided under separate cover to the applicant from the Department of Water & Wastewater and copied to the Planning and Inspections Department in order to confirm completion with the Department of Water & Wastewater prior to final inspection. As such, no delay in the receipt of your Plumbing or Building Permit will occur.

Brief Description of Work (To Be Completed by Applicant):

To Be Completed By Planning & Inspections Staff  
 Building Permit #:  
 Plumbing Permit #:
