

City of Dover

Department of Public Works

Street Sweeping Schedule Change

Due to the cold temperatures, street sweeping operations will be suspended for the first quarter of each calendar year starting January 1st and ending March 31st. The City of Dover Department of Public Works Streets Division will postpone regular street sweeping for both day and night operations. Only emergency and as needed street sweeping will occur during the postponement. If any sweeping is required, it will be completed during the day shift. Street sweeping signage will be bagged until such time that replacement signage can be installed. It is our intention to continue to provide a level of service that is productive, proactive and presentable. While it is important that the City of Dover maintains this important operational service, the City must sustain the life and operational capabilities of its street sweepers by adhering to the vehicle manufacturer's operating guidelines. The street sweeper utilizes water to complete the operation and during the cold months, the water can cause damage to the vehicle. As we work to provide our residents and visitors alike with quality service, we ask for your patience and understanding during this transition. Please join us in supporting these street sweeping changes as we continue to work hard for you!
